

ON-SITE LOCOMOTIVE FUELING & MECHANICAL SERVICES

Velocity Rail Solutions proudly provides locomotive fueling, fuel transport and mechanical services for Class I railroads at customer locations throughout North America. Our technology, scale, customer relationships and processes enable us to deliver reliable, safe, professional and efficient services.

OUR CAPABILITIES

We provide locomotive fueling, locomotive servicing, fuel transport, railcar repair and locomotive switching services. Our technology enables us to provide accurate data for fueling transactions, including the truck number and driver's name, site, location and GPS coordinates of the truck, as well as start and end timestamps of service, number of gallons provided, truck balance and locomotive end tank balance. Our customers rely on us for accountability, inventory control and reduced fuel loss.

CORE COMPETENCIES

Locomotive Fueling

- Direct to locomotive fuel delivery
- Direct to storage fuel delivery
- Direct to intermodal crane and hostler truck fuel delivery
- Combination locomotive fuel and service trucks
- Eagle Eye On-Board Technology system for tracking real-time data
- Railcar Reefer Fueling

Mechanical Services

- Locomotive daily inspections
- Locomotive cleaning services
- Deliver oil, water and sand
- Test air brakes, distributed power and load testing
- Locomotive brake shoe replacement
- Replenish crew packs and water
- Remove trash
- Service locomotive toilets
- Inspect trains and repair cars
- Locomotive switching services
